Greater Copenhagen Area, Denmark

PROFESSIONAL PROFILE

UX/UI Designer with a focus in information architecture and systems thinking. I structure complex problems during the early stages of product development by defining rules, roles, workflows, and system architecture before designing interfaces. I incorporate quality-oriented thinking to validate decisions, and create solutions that are clear, consistent, and reliable.

EXPERIENCE

Volunteer UX/UI Designer – Information Architecture & Accessibility

DiversoJob

June 2026 – Present

- Conduct UX research, structuring interviews to reduce cognitive load and encourage complete, reliable responses.
- Design the user journey beyond interfaces, considering every interaction from the first contact with the product through research, surveys, and usability testing.
- Translate complex organizational structures into clear, usable, and accessible user flows.
- Integrate accessibility into information architecture from the early stages of design, beyond technical compliance.
- Contribute to maintaining consistency across the system's design and interaction patterns.
- Collaborate on the accessibility strategy for the AI chatbot experience.
- Work closely with developers and the QA team throughout the design process.

UX/UI Designer – Information Architecture & Interactive Design

Personal Professional Portfolio

February 2026 – June 2026

- Defined the conceptual and information architecture supporting a professional portfolio centered on Systems Thinking and Information Architecture.
- Designed the portfolio's information architecture, organizing content, relationships, and navigation beyond a traditional linear structure.
- Translated complex conceptual frameworks into intuitive user flows, interaction patterns, and visual hierarchies.
- Designed and prototyped an interactive visual system to communicate relationships between concepts through typography, motion, and spatial organization.
- Iteratively refined content, interaction, and visual language to strengthen the communication of the professional profile.

UX/UI Designer - Systems Thinking

ABC Comunidad - personal project

December 2024 - July 2025

- Researched the provincial education system and user needs to map institutional constraints, stakeholder roles, and communication pain points.

- Conducted interviews and surveys to identify friction in school-family communication processes.
- Defined teacher user requirements, interaction rules, and workflows to reduce ambiguity and administrative workload.
- Designed the information architecture of a communication platform connecting teachers and families within the public education system.
- Created task flows, user flows, and information architecture based on real-world operational constraints.
- Developed low-, mid-, and high-fidelity prototypes following a design system built using Atomic Design principles.

QA Trainee

Yacoli IT Consultancy SAS

March 2024 - August 2024

- Performed functional and exploratory testing for web and mobile applications.
- Identified inconsistencies and unexpected system behaviors with a focus on user impact.
- Executed REST API testing using Postman and performed SQL-based data validation.
- Reported defects and collaborated within Agile development teams.

EDUCATION

QA Automation Program — Ministry of Education, Buenos Aires City (2026)

Diploma in UX/UI Design — National Technological University (2024–2025)

Academic Update in Computer Science Education — Sadosky Foundation and Buenos Aires Province Education Department (2025)

Bachelor's Degree and Teaching degree in Visual Arts — National University of La Plata (2014–2022)

TECHNICAL SKILLS

Research

Contextual Research · Interview Design · Survey Design · Systems Analysis

Systems Design

Information Architecture · User Flows · Workflow Design · System Rules & Logic Definition

UX/UI

Interaction Design · Prototyping · Accessibility · Design system (Atomic Design)

Prototype Development

Interactive Prototyping · HTML · CSS · JavaScript · VS Code AI Agents

Quality Assurance

Functional Testing · Exploratory Testing · API Testing · Postman · SQL

QA Automation

Python · Pytest · Selenium WebDriver · Git · GitHub

Automation & Process Design

Workflow design with N8N · Process Modeling · AI-Assisted Workflows

Tools

Figma · FigJam · Framer · Jira · Qase · Miro · Google Workspace

LANGUAGES

Spanish (native) · English (B2)
